World's Finest Fruit and Ornamental Trees

Princess Anne,

Maryland

Rear End Side View of Our Large Storage and Packing
House, Built During January and February, 1926

INTRODUCTION

We wish to take advantage of this opportunity to thank our many friends for their liberal patronage through the past season and will say that the great increase in our business this past spring is indeed very gratifying to us and spurs us on to greater efforts to produce and deliver stock to our customers that is superior in every way, stock that will give to them the desired results in thrift and productiveness, stock that is **true to name** and which they will take pleasure in showing to their friends and will not hesitate to tell from what nursery they secured it.

It is with pleasure that we have occasion to issue this supplement to our general catalog for in it we feel that we are going to bring to your attention two new fruits that you will want and that will be a valuable addition to the fruits you are now growing. They are new additions to two of the greatest classes of fruit we have today, the Peach and the Apple, and being of the class and quality that they are we feel that it will only be a short time till they will take their place among the leaders.

We do not want to treat too liberally with praise for the merits of these new fruits, rather desiring to be conservative and telling our friends the plain facts about them and letting them be the judge for we feel that we cannot misuse the confidence and trust that our thousands of friends in every part of the country have placed with us, those who have helped us through their patronage to grow from a very meager start to a well developed Nursery, by making any undue statements regarding this new peach and new apple that we now have to offer them. We feel though that the quality of these fruits and season

of each is such that no one, wherever they are located, whether they be a large commercial fruit grower or only have room for a small home orchard or even a few trees, can be without them.

You will find a detailed description of our new peach, "The Hope Farm," and our new apple, "The Monmouth Beauty" on the following pages. We ask that you read carefully all that we have to say regarding them, noting their many qualities, then tell your friends of them and place your order with us for what you want for the coming fall and spring.

General Information

THIS Catalog is our only salesman. We employ no agents; if we did, we could not sell our stock for the price we do. Agents receive from 35 to 40 per cent for selling and on top of this 15 to 20 per cent for making delivery of the trees, plus the freight, which as a total make up about 65 cents out of the dollar's worth you buy. Figure this carefully and you can readily see how we can sell you through our catalog better trees for less money than you can possibly get by buying from agents.

OUR STOCK

All of our trees, vines and plants are grown under the personal supervision of our Mr. George W. Kemp, who has had over 40 years' experience in the nursery and orchard and knows the principles and science of producing high grade trees, vines and plants as well as any other man in the country. If you want stock that is true to name and properly grown, packed and shipped, so as to reach you in the finest of condition, then place your order with us and you will get it.

INSPECTION

Our Nurseries are inspected regularly every year by our State Entomologist and are known to be free from injurious insect pests or diseases of any kind. Certificate of inspection goes with every order when shipped.

MISTAKES

We use every precaution that is humanly possible to avoid mistakes and believe that we are as near free from them as any Nurserymen in the United States; but in the event any of our stock should prove untrue to name under which it is labeled or sold, we will replace the original order or refund the amount paid for such stock. Further than this we are not responsible.

IMPORTANT—BE SURE TO READ THIS

Our Shipping Season. We pack and ship all through the winter to Southern states. Our regular spring shipping and packing season usually opens here about the 15th of February and continues until May 10th. Our fall shipping season opens about October 15th and continues to Northern points until December 1st.

ORDER EARLY

As our orders are shipped out in the rotation they are received, we advise you placing your order early and specify in your order the date on which you wish it shipped.

HOW TO ORDER

Make out your order carefully on the order sheet in this Catalog, make your order perfectly plain and indicate distinctly how you want the stock shipped—by freight, express or parcel post.

RATES

1 to 6 trees at the each rate; 6 to 50 at the ten rate; 50 to 350 at the 100 rate, and 350 to 1000 and more at the 1000 rate.

All Boxing, Baling and Packing Free.

GRADING

We guarantee every tree to be as represented in grade and quality, and if upon arrival you do not find our trees to be exactly as we say they are, return them to us securely packed and we will refund to you every dollar you have paid us for them. This is as fair as we can offer.

DISCOUNTS

On all early orders we make you a discount of 2 per cent, if cash in full accompanies the order. On all orders amounting to \$50.00 we will prepay the freight to your depot up to a distance of 500 miles from our Nursery.

HOW TO REMIT

Remittance should be made either by Post Office money-order, registered letter, or by check on your bank.

SMALL ORDERS

Because of the high cost of labor, packing material, implements and land, we cannot accept orders for less than \$2.00.

OUR TERMS

Our terms are cash except in large orders when satisfactory reference is given; then one-third the amount of the order must be sent and balance on arrival of trees at depot. On early orders the amount can be sent in and balance a few days before shipment. Prices in this Catalog or in the enclosed price list are for the present season only.

THE HOPE FARM PEACH

We do indeed feel honored for having the privilege to offer to our thousands of friends throughout the country a product of Hope Farm, and that Mr. Collingwood, President and Editor of the Rural New Yorker should place the confidence he has with us in giving us the sole right of propagation and dissemination of this product of HOPE FARM. For we feel that most of the farming districts in the east are acquainted with the Rural New Yorker as a farm paper and know that it is a staunch friend of all of its subscribers, always standing ready to protect their interest as far as it is possible for them to do so, believing in and practicing a principle of truthfulness and square dealing to all.

Hope Farm is located in Bergen County, N. J., and is owned by Mr. Collingwood. It is here that Mr. Collingwood puts into practice many of the new ideas of modern agriculture, draws his conclusions and passes them to his friends, his subscribers. This farm is the source of the HOPE FARM notes that every reader of the Rural New Yorker paper has enjoyed for so many years and still read with eagerness. It was here Mr. Collingwood found the Peach seedling growing that is now destined to be known the country over as the HOPE FARM PEACH.

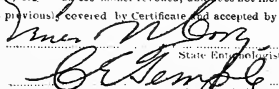

After watching this seedling grow into fruiting age and noting its hardiness, its resistiveness to the more common diseases known of in peach culture, and the fine quality of the fruit which it bore, he was awakened to the real possibilities of being able to give something to the world in the way of a new fruit as a lasting remembrance of HOPE FARM. With this in mind he watched the

tree carefully through the year to the ripening of the splendid fruit, for a few years. He then faced the problem of finding a responsible nurseryman whom he could consult regarding it and placing the peach before the public entirely on its merits.

Mr. Collingwood first called our attention to the Peach in October 1923. The following year at Mr. Collingwood's request and desiring to see the original tree in fruiting, we went to Hope Farm while the tree yet had its fruit on it. To say the least, we were highly impressed with the Peach in every way. During the season of 1925 the Peach repeated, only being better than the previous year and it was then that Mr. Collingswood's hopes were fulfilled regarding the peach and placed it with us for propagation and dissemination.

We asked that Mr. Collingwood knowing the tree and the fruit as he did, write the full description of the peach. The following is an exact copy of description of the peach which Mr. Collingwood gave us, and is as we have said it would be: Conservative, stating only the true facts about the Peach.

While writing the Hope Farm Notes recently, Mr. Collingwood referred to the HOPE FARM PEACH, stating that it would NOT be brought to the attention of the people "WITH A BLARE OF TRUMPETS" and unreasonable claims for the peach, but rather stating conservatively the true facts and merits of the peach, desiring more to have it planted and thoroughly tested in every section of the country and in this way prove its worthiness. With this in mind, Mr. Collingwood gave us the following description of the peach in October 1925.

UNIVERSITY OF MARYLAND	
COLLEGE PARK, MARYLAND.	DATE. <u>Aug. 31, 1925</u>
	
STATE HORTICULTURAL DEPARTMENT	
Certificate of Inspection

Nursery Stock on <u>The Bountiful Ridge</u> Nurseries	
growing in <u>their</u> nurseries, at <u>Princess Anne</u> County of <u>Somerset</u>	
State of Maryland, in accordance with the laws of Maryland, 1898, Chapter 259, Section 58, and that said nurseries and premises are apparently free, so far as can be determined by inspection, from the San Jose Scale, Peach Yellows, Pear Blight and other dangerously injurious insect pests and plant diseases.	
This Certificate is valid until <u>Sept. 1st</u> 192 <u>6</u> , unless sooner revoked, and does not include nursery stock not grown within this State, unless such stock is previously covered by certificate and accepted by the State Entomologist and State Pathologist.	
 State Entomologist.  State Pathologist.	

Our trees are healthy. A certificate of inspection goes with every shipment that leaves our nursery.

Description

THE HOPE FARM PEACH

This peach originated as a chance seedling at Hope Farm, in Bergen County, New Jersey. It has long been our ambition at Hope Farm to give the world some new fruit, good enough to be worthy of carrying the name, and give comfort and pleasure to the world long after we have passed on out of it. At the same time we have recognized the fact that there are already too many fruit varieties in cultivation, and that only the very best or those which possess superior qualities should ever be added to the list. We should not think of presenting this new candidate for favor unless we felt absolutely sure it has superior merit.

Six years ago (1919) when cleaning up the barnyard, in the Fall, we found a small peach tree growing, as it seemed, out of a loose stone foundation of a small building. Apparently some one had passed by eating a peach and carelessly thrown the pit away. It had sprouted and established itself by the side of this building. By the merest accident it was

not destroyed. It grew in the most undesirable place that could well be selected for a peach tree.

The situation is cold and sunless, being densely shaded by thick and tall shrubbery. The soil is hard and unpromising, but the little tree grew abundantly under these hard conditions. The next year after discovery the tree showed a most remarkable vigor with strong, heavy foliage and quick growth. This great vigor of growth is one of the strong characteristics of the tree. In the nursery row it appears to outstrip other varieties easily. The parent tree stands in a place where cultivation is impossible, yet it has developed into large size. At three years it bore a few peaches enough to show the character of the fruit, and it has produced large crops since then.

A fair sample of the peach is shown in the illustration though the average will run larger than is here shown. In any remarks or pictures of this peach we desire to be fully conservative and not make any statement or appearance which is in any way exaggerated. In color Hope Farm is a light yellow with a dark red check. The flesh is white with a yellow tinge. It is a clean, freestone with a flavor which we consider superior to Belle of Georgia. It is one of the best shipping peaches being firm and solid. We have mailed specimens for long distances and given it a fair trial. It has always stood the journey perfectly. Its season of ripening is a week to ten days later than Elberta, so that with its fine quality and attractive appearance, it will fill a distinct place in the peach season. In any section where the tree will thrive Hope Farm may be recommended for its great vigor and hardness, its high quality and beauty, and its late season of ripening. It will prove, as I firmly believe, the most popular late peach of its color and class and it can be confidently recommended to all those who are interested in new varieties, or in profitable peach culture.

H. W. COLLINGWOOD.

A keen interest has been shown by the planters wherever we have mentioned this peach to them and we may say that we do not think that any planting of fruit trees is complete without it. Our supply of these trees is very limited and we should advise the placing of your orders early either for fall of 1926 or spring of 1927 shipment. **REMEMBER** we are the only Nursery from which you can secure this wonderful peach so do not delay ordering your supply of trees.

Our new Apple, MONMOUTH BEAUTY, originated in Monmouth County, New Jersey, in the orchard of Mr. Charles Applegate, near Freehold, N. J., and today is the World's Finest Mid-season Commercial Apple, standing as it does without an equal. A thorobred and a prize-winner.

OUR NEW APPLE MONMOUTH BEAUTY

It is a great source of satisfaction to us that we can offer to our many thousand customers and friends throughout the country this most remarkable seedling sport which we have named the MONMOUTH BEAUTY in conjunction with the HOPE FARM PEACH. Truly a combination that is a credit to any nursery and one that no one who is a lover of beautiful and good fruit can afford to be without.

The interest shown by fruit growers in every part of the country since the issuing of our general catalogue Spring 1926, in which we gave a description of this wonderful apple, is indeed gratifying to us, this interest being further substantiated and showing the complete confidence in the possibilities of this apple, many have placed their advanced orders with us for delivery of their trees during fall of 1926 and spring of 1927. It has been spoken of with praise and enthusiasm ever since its first appearance before the public in the Horticultural Exhibits at the Trenton Inter-State Fair, Trenton, N. J., September 28th-October 3rd, 1925, winning a blue ribbon for first prize there and rightly so for no one seeing the apple can help but at once see its superior beauty and its possibilities as a money maker for the commercial orchardist. This apple was also the center of attraction at the Jersey State Horticultural meeting held in Atlantic City, December 1925.

It has been brought to the attention of the Horticulturists of practically every state in the east and the United States Horticultural Department at Washington

BOUNTIFUL RIDGE NURSERIES — PRINCESS ANNE, MD.

and they all say with one accord that it is a most remarkable apple, with unusual beauty and has wonderful possibilities as a highly profitable commercial apple of its season in the future.

We will distribute the first trees of the **MONMOUTH BEAUTY** during the coming fall 1926 and spring 1927. We desire to be frank with all of our customers and friends, stating only the true facts regarding any stock we have to offer them and will say that here is an apple that has no equal of its season, an apple that no fruit grower who is awake to the increasing demand of the consumer for the best, can afford to be without and an apple that gives one a pleasure to watch grow from blossom time in the spring till the time to harvest them.

The following is as complete a description of this wonderful apple as it is possible for us to give. **READ IT CAREFULLY**, and should there be anything that you wish to ask regarding it, write to us and we will be glad to give you what further information we can.

DESCRIPTION

We are about to tell you of a new variety of an apple and it is only natural that very one should want to know something of the history of this apple and we are going to tell you of it as near as we possibly can. We feel that we are not going to do the apple justice in all the good things we say about it, but we desire to tell the plain facts about it and let the real fruit growing public pass the judgment on this apple in general.

The origin of this apple as near as we can possibly tell is put forth in the following statement from Mr. C. R. Applegate in whose orchard the apple made its first appearance. Mr. Applegate says: "Referring to the history of the new apple that I have discovered in my orchard would say that this tree was set in as a filler in a Duchess of Oldenburg block where a tree had died. After this tree was set it died back and a new shoot appeared from the ground. When I pruned the following year I discovered this shoot and my intention at that time was to bud or graft this shoot over later but forgot all about it. The following spring when I pruned I found that this shoot showed characteristics that I was not familiar with, showing thrift and looking promising otherwise so I decided to let it stand and see what it would amount to. The result was that it has grown to be a fine tree and it has now fruited for two years in succession and I think it is far superior to any other apple of this season that is now in cultivation.

Note: Mr. Applegate is a practical orchardist, cultivating successfully several hundred acres of orchards in Monmouth County, N. J.

Our attention was attracted by this apple in August, 1924, while in Mr. Applegate's packing house near Freehold, N. J. and we were very favorably impressed with the general appearance of the apple and we asked to see the tree from which the fruit was picked. The following is a description of the tree from our first observation and the many times we have seen it since. The tree has semi-dwarf characteristics such as the Wealthy, only more spreading, producing a very rugged growth, that is, not long but strong in its general make up, wood very hard and tough, the tree growing thin and spreading, giving the fruit the necessary light and air that is so essential to coloring of the fruit early in the season. The tree showed no signs of blight or cankering or any other defects that accompany so many of the good varieties of apples we now have. It makes its growth early in the year and often sets fruit spurs on the new growth to produce fruit the following year. The fruit spurs are evenly distributed from the base of the limbs to the terminal growth similar to the McIntosh Red, thereby distributing the fruit well on the tree so as to produce a good crop and good color on the fruit. The blossoms are hardy and stand the cold snaps well that we sometimes have during the blossoming time in the spring, the blossoms opening about the same time as the Duchess.

The original trees has fruited two years in succession now which makes it an annual bearer and now has an abundance of fruit spurs on it for the coming season. The apple is not a tender apple during the growing season and is not subject to spray burn or scab or other injurious diseases that some of the more tender apples are subject to. The apple colors well early in the season and gets good size early, thus giving you a long season over which to harvest the apple. The market is demanding a large red apple at this time of the year and this apple is beautifully colored with a bright red running off on the calyx end of the apple to a slight yellow streaked with red giving a very attractive appearance, one that at once catches the eyes of the public. The apple is round and inclined to be a little flat from the stem end to the calyx end being very similar in shape to the Rome Beauty apple. The calyx end of the apple is medium shallow and clean in its appearance. The skin is very tough on the apple, making it a very good apple for shipping and it will not show bruises by turning dark where the injury is received, like so many apples we now have. We consider the quality one of the best combinations possible to get in an apple for this season. The flesh of the apple is white and very fine in texture, being tender and just a little acid, just enough to make it a good cooker and to give it a spicy flavor for eating. Here is an apple that is one of the best to eat and at the same time makes the finest sauce and pies. The apples have plenty of juice for a general purpose apple.

DIRECT FROM GROWER TO PLANTER

The season of this apple is just after the Duchess of Oldenburg or ripening in Monmouth County, N. J. about August 5th to 25th, depending on the season, the apple colors early and hangs well on the tree, giving the grower a long season over which to pick the apple. It will keep in common storage till October, and can be put in cold storage and brought out in prime condition in February. The apple sizes up well, there being no seconds on the tree hardly, most of the apples grading from two to three and one half inches. We filled a round bushel with 64 of these apples this season with the average run of the tree.

This apple, having its origin in Monmouth County, New Jersey, and in the field over

Photograph of original tree of Monmouth Beauty apple in the orchard of Charles Applegate, near Freehold, N. J., showing the fine apples on tree with Mr. Applegate holding up a branch heavily loaded with fruit. Note the comparative size of the apples.

which our brave soldiers fought the battle of Monmouth in the Revolutionary war, we feel that we could give it no more fitting a name than Monmouth Beauty and have so named it—MONMOUTH BEAUTY.

This apple made its first appearance before the public at the Trenton Interstate Fair, September 28th-October 3rd, 1925, and was pronounced to be the most beautiful apple on exhibi-

BOUNTIFUL RIDGE NURSERIES — PRINCESS ANNE, MD.

tion there during the Fair and has been spoken of with favor by the leading Horticulturists of the East as well as some of the leading orchardists who have seen it.

These are the plain facts about the apple as near as we can state them and it is our desire to have this apple planted in every section of the country and tried to the limit for we feel that it will prove itself worthy and will soon be one of the most profitable apples of the summer or mid-season varieties.

In view of the fact that we have booked at this time hundreds of advance orders for this wonderful APPLE and knowing how limited our stock of them is, we advise our friends who are particularly interested in this variety to place their orders early and have the trees reserved for them for REMEMBER, WE ARE THE ONLY NURSERYMEN FROM WHICH ANYONE CAN SECURE THESE TREES.

BOUNTIFUL RIDGE NURSERIES.

THE NEW CORTLAND APPLE

Origin of Cortland Apple

Twenty-eight years ago at the New York Agricultural Experiment Station, Geneva, New York, flower buds of Ben Davis were hand pollinated with pollen from McIntosh blossoms. That was in 1898, and during the Winter of 1899 eleven seeds obtained from the resulting fruit germinated and grew into trees large enough to set in the nursery that Spring. In due time these young seedlings were moved to the orchard and there first bore fruit in 1911, although fruit from the budded stock had been obtained five years before. All but three of the original seedlings were quickly discarded. The seedling that was later to be called Cortland was propagated by budding to increase the supply of stock and was named Courtland and sent out for trial in all parts of the country in 1915.

Possesses Desirable Characteristics of Both Parents

Cortland more nearly combined the good qualities and eliminated the weaknesses of both parents than had ever been hoped for by those responsible for this remarkable variety. From the Ben Davis side of the family it derives one of its most notable and valuable characteristics, namely, its ability to hang to the tree. To the credit of Ben Davis must also be entered its ability to stand handling. Those who grow Cortland testify that it handles as well as the Baldwin. For its high quality Cortland must look to the McIntosh side of the house. The taste can hardly be distinguished from that of McIntosh, but is even richer if that be possible.

Description of Cortland

The fruit of Cortland is as large or larger than that of McIntosh, round to somewhat conical in shape. In color it is a bright red, blushed with darker red, splashed and striped with carmine and more or less overlaid with a deep purplish bloom. The flesh is white often with a pinkish tinge, fine, crisp, tender, juicy, sub-acid and aromatic. The trees are large, vigorous, upright-spreading, very hardy, productive and healthy. Flowers bloom in mid-season. Fruits about three weeks later than McIntosh.

Hangs Well to Tree

A prominent fruit grower writes in The Rural New Yorker as follows: "I visited the Cortland and McIntosh orchard of Mr. William Hotaling on September sixth and he was picking his McIntosh. Exactly four weeks later we were again in the vicinity and this time the Cortland Apples were just ready to pick. The Cortland Apples were hanging tenaciously to the trees. Under one tree that was carrying between three and four bushels of fruit were lying five or six apples, while other varieties nearby were dropping badly, due to the twenty-mile wind that was

DIRECT FROM GROWER TO PLANTER

whipping through the orchard. The few Cortland Apples that were on the ground had the stems torn out. In other words, the Cortlands that had dropped had been literally torn from the trees by the whipping of the wind."

PHOTO TAKEN AUG. 1, 1925

A sectional view of one of our two-year-old blocks of apple trees, showing the quality of our 2-year-old trees with which we fill our customers orders. Note the size of trees on date photo was taken. They are the best that can be grown; try them, they will please you. The growing of select apple and peach trees for the commercial orchardist is our specialty. We consider the best is none too good for our customers and our trees have proven their merit against all competition.

We specialize in the growing of fruit trees, producing them expressly for the need of the large planters, and in this supplement to our large descriptive catalog which we issued spring of 1926, we will only give the descriptions of such varieties as we have added to our stock and those that we consider the leaders in their classes of fruit, following this with a complete list of the varieties of each class of fruit, the descriptions of which you will find in our general catalog. IF YOU DO NOT HAVE YOUR COPY OF THIS CATALOG, WRITE TO US FOR IT AND WE WILL SEND YOU ONE AT ONCE.

These are our latest prices and any prices issued before this are now void.

YELLOW TRANSPARENT — Season, July. One of the most valuable early apples. Fruit medium, smooth, transparent skin; clear white, becoming pale yellow when fully ripe; flesh white, tender, fine grained, of splendid quality. Tree is moderately vigorous and a good annual bearer. One of the few sorts that do well even on poor thin land.

CRIMSON BEAUTY — Very hardy, strong grower and very productive; extremely early bearer, earliest ripening apple known. A beautiful large red apple and good market variety. Two year trees in the nursery rows frequently produce fine fruit. Flesh, sub-acid, pleasant to eat out of hand. Unexcelled for pies and sauce.

STARR—One of the finest early apples grown in New Jersey. Can be picked over a long period of time; large and of a fine yellowish color; a great bearer and valuable market variety; comes into fruiting very young.

ENGLISH CODLING—This apple ranks among the most profitable apples for New Jersey. A good bearer, color green, large in size, a splendid baking apple and sought after very much by city buyers.

WEALTHY—Is now extensively planted in all the apple-growing states and may be termed the best apple of its season. Fruit large, regular, smooth, light yellow with crimson stripes and splashes; flesh white, often stained with red, tender, very juicy, sprightly sub-acid with delicious aroma. Splendid dessert and cooking apple. Fine for home garden as well as commercial orchards. Season, September to January.

TWENTY OUNCE—Fruit exceptionally large, yellow and red. Juicy and crisp, sub-acid. Tree is vigorous and productive. October to January or February.

DELICIOUS—A remarkable variety introduced in the West several years ago where it is being largely planted and rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit, large, nearly covered with brilliant dark red flesh, finely grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardiest, a vigorous grower, with good foliage. A regular annual bearer.

GRIMES GOLDEN—An apple of the highest quality. It is one of the fancy dessert apples and ranks with Delicious and Jonathan on the markets. Medium to large; bright yellow with pink cheek; flesh finely grained, juicy, with a very pleasing spicy flavor. Like Jonathan it is equally adapted to almost all culinary uses as well as for eating out of the hand. For pies, marmalade, sauce and dumplings, it is one of the best. It has hardly enough acid for the best jelly apple. The tree is hardy, grows upright and is quite disease and insect resistant. Season of fruit, November to January.

McINTOSH—In our opinion not equalled in quality and flavor by any other variety with the exception of the Cortland, its progeny, which it resembles very much. Due to its very high quality and its exceedingly attractive appearance, it commands a ready sale and a fancy price in all the large eastern markets. Has held the record for high price for years in Boston, New York, and Chicago markets. Rapidly making a place for itself as one of the leading if not leading commercial apples of the east. The fruit is very attractive in appearance, of bright deep red color, which in highly colored specimens

is almost purplished overspread with a thin lilac bloom. Fruit above medium in size, with white, firm, very crisp flesh, fine-grained, tender, very juicy. Sprightly sub-acid in flavor with a characteristic perfume and aroma. The tree is rather a strong grower, very hardy and healthy. Comes into bearing about the fourth year and is a reliable cropper, yielding good crops annually. We recommend it highly to eastern orchardists. In season from October to December or later.

ROME BEAUTY—Keeps in good condition till May and June. Large, round, mottled and striped in different shades of red; flavor and quality away above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit, Rome Beauty is a variety Eastern Orchardists should plant largely. Good grower, blooms late, bears heavily every year, is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York and West Virginia will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure bearer make it a favorite with the grower. Fine quality for use and for handling makes it popular with consumers and dealers. When packed in boxes shows up splendidly.

STAYMAN'S WINESAP—Tree vigorous, hardy, spreading. An early bearer and very productive; fruit medium size, round, approaching conic, skin smooth, greenish yellow, splashed and striped with red and purple; flesh yellow, firm, tender, juicy, rich, sub-acid aromatic, quality best. Splendid late keeper.

BALDWIN—Season, December to March. The great commercial late winter keeper of the Eastern States. Tree a vigorous open grower, upright in tendency and very productive where hardy. Comes slow into bearing, but produces abundantly when mature. Fruit large, rounded, deep red; flesh rich, crisp and juicy.

This block of One-Year-Old Apple Trees contains 50,000 trees of the following varieties: Yellow Transparent, Duchess, McIntosh, Stayman's Winesap, Paragon, Rome Beauty, Delicious, Grimes Golden, York Imperial, N. W. Greening, Baldwin, Wealthy, Smokehouse. Photo was taken August 1st, trees then showing a growth of 4 to 5 feet, with two more months to grow. An orchard planted with trees like these will surely increase its owner's bank account.

You are assured of receiving the best when you deal with us. We feel we have no better references as to stock than our customers. Could anyone ask for a better example of Bountiful Ridge Nursery stock than this large planter has experienced?

Bridgeville, Del., May 7th, 1926.

Bountiful Ridge Nurseries,
Princess Anne, Md.
Gentlemen:

Please find enclosed check for the invoice enclosed. I wish to advise you that my trees bought from you last fall went through the winter in fine shape and that I set them this spring and at this writing I have found NO DEAD ONES. They were as a whole a very fine lot of trees, and I am certainly well pleased with them. I don't think I had to throw away OVER TEN of the entire lot FIVE THOUSAND FIVE HUNDRED I got from you. This, I am sure, is satisfactory.

Yours very truly,
J. T. VANDENBURG.

PEACHES

THE BRACKETT PEACH

This is a comparatively new variety in some sections but has been tried and proven one of the most profitable peaches in the south. Its season is about five days after the Elberta, with a beautiful orange-yellow skin tinged with carmine. Flesh is a deep yellow and much higher flavored than the Elberta. This Peach sizes up well under heavy crops and is equal to the Elberta as a shipper. A perfect freestone. These qualities combined is fast bringing it to the front as one of our best commercial Peaches and can be considered a three point winner, in color, in size and in quality.

BELLE OF GEORGIA—Fruit large size; red and white; flesh white, firm and highly flavored. This variety has become one of the standard varieties in the big commercial orchards, both North and South. Stands shipping well and brings top prices. In many respects it is equal to Elberta. Tree a rapid grower and very productive. Perfect freestone.

CARMAN (Free)—Large; resembles Elberta in shape; creamy-white with deep blush; skin tough, making it a good market variety; flesh tender, juicy, and fine flavor; a prolific and regular bearer.

EARLY ELBERTA—This is one of the finest of all the Elberta family, being larger than Elberta, finer flavored, as handsome in color, perfect freestones. Whoever plants this variety will be more than satisfied, as it is a money maker and a great peach for all purposes. Ripens from one week to ten days earlier than the regular Elberta.

ELBERTA—The leader of all peaches and the greatest commercial variety on the market; 50 per cent. of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy and

high flavor; flesh yellow, freestone. Season medium early, following quick upon Early Crawford, August.

ROBERTA—A new variety that is becoming justly popular. It is very similar to the Elberta in all respects except its season, which is a week to ten days later. The Roberta is an excellent variety to plant to lengthen the Elberta season.

J. H. HALE—A description will hardly do justice to this fine variety. In size it is one-third to one-half larger than the Elberta and is more highly colored. The skin is deep crimson, smooth, tight, and without fuzz. Flesh is golden yellow, firm, and has a most delicious flavor. The pit separates easily from the flesh. It is exceptionally valuable as a commercial Peach owing to its unusual keeping and shipping qualities. Will ship nearly as well as an apple. Fruit ripens about five days before the Elberta, but it will hang on the tree longer. Your collection is incomplete without this variety.

NOTE—The J. H. Hale does not have an entirely perfect bloom and to get best results it should be planted with some other variety. The Hiley being recommended by some state departments, while it is known Elberta will do when planted every fourth row.

SLAPPEY—A comparatively new yellow freestone, which ripens at about the same time as the Rochester and the Early Crawford, both of which it excels in every way. It bears early and heavily.

Other reliable varieties we have

Alexander	Krummel's October	Foster
Champion	Levy's Late	Globe
Crawford's Early	Smock	Greensboro
Arp Beauty	Yellow St. John	Heath Cing
Chair's Choice	Crawford's Late	Mayflower
Hiley	Crosby	Rochester
Iron Mountain	Early Wheeler (Red Bird)	Salway
June Elberta	Fitzgerald	Sneed
Stump	Triumph	

PRICES—All varieties except HOPE FARM

PEACH TREES—All varieties—1 to 6 trees at the each rate; 6 to 50 at the ten rate; 50 to 350 at the 100 rate, and 350 to 1000 and more at the 1000 rate.

Our Peach run heavily in caliber to height and are fine—Try them.

DIRECT FROM GROWER TO PLANTER

CRAB APPLES

HYSLOP—Season, September to October. Tree vigorous where hardy; blights in some localities. Fruit medium; yellow ground with heavy shadings of deep crimson and splashes of maroon with heavy blue bloom; flesh fine, firm, yellow, astringent; bears abundantly in clusters, which make tree exceedingly ornamental. Its high color always commands a fancy market price for it. One

of the most desirable sorts for culinary purposes.

WHITNEY—Season, August. Fruit large to very large for a hybrid; yellow, striped with red and mostly covered with red on sunny side; flesh yellow, very juicy and fine grained; flavor rich and almost sweet.

Other Varieties—Florence, Red Siberian, Transedent, Yellow Siberian.
PRICES SAME AS ALL STANDARD APPLES

This photo shows our truck loaded with trees for Delaware customers and the men who packed them.

CHERRIES

EARLY RICHMOND—One of the most valuable and popular cherries, unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head, exceedingly productive. Ripens through June. The cherry tree bears almost every year, and is an easy fruiter.

LARGE MONTMORENCY—This is the best of all the sour varieties of Cherries. There is a greater demand on the market for this

Cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of the best fruit of all other sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good-sized, fine flavored and bright clear red. Fruit ripens 10 days after Early Richmond.

Other varieties—English Morello, Wragg.

CHERRIES—sour

	Each	10	100	1000
Large Montmorency, 1 yr., 3-4 ft.	70c	\$6.50	\$40.00	\$300.00

Large Montmorency, 2 yr., 11-16 and up	1.00	8.00	60.00	550.00

Early Richmond, Wragg and English Morello—In all grades 5c per tree more than Montmorency.

CHERRIES—SWEET

NAPOLEON BIGGAREAU (Royal Ann)— A beautiful cherry of large size; pale yellow with bright red cheeks; flesh firm, juicy and sweet; one of the best for market and canning. The hardiest of the light-yellow cherries and deservedly popular. Late.

GOVERNOR. WOOD — Large, hart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

Other varieties—Black Tartarian, Lambert, Windsor.

SWEET CHERRIES—All Varieties

	Each	10	100

MULBERRIES

Downings Everbearings, New American, Russian

All varieties, fine 4 to 5 feet trees..... \$1.25 each

PLUMS

European, Native and Japanese Varieties

ABUNDANCE—One of the best Japan Plums. Tree is very rapid grower, healthy and comes into bearing quite young and yields abundantly; medium size, rich, bright cherry red with distinct bloom and highly perfumed; flesh light yellow, juicy and tender, and excellent quality. Tree vigorous and hardy.

BRADSHAW—Very large, dark violet-red; flesh yellowish-green; juicy and pleasant; tree vigorous, erect and productive. August.

GERMAN PRUNE—A valuable Plum of fair quality for dessert, but most esteemed for drying and preserving. Large, long-oval, purple, with a thick blue bloom; flesh firm, sweet and pleasant, separating from the stone. Moderate to vigorous in growth. September.

LOMBARD—Medium, roundish-oval, violet-red, juicy and pleasant; adheres to stone, valuable market sort, hardy and adapted to light soils; a reasonably sure cropper.

A truck load of 7000 Trees ready to go to New Jersey customers. These trees will be delivered in perfect condition. No exposure either to root or top.

Other reliable varieties—Beauty of Naples, Damson, Imperial Gage, Moores Arctic, Shropshire, Shippers' Pride, Yellow Egg, Burbank, Red June, Wickson, De Soto, Forest Garden, Hammer, Hawkeye, Pottawattamie, Weaver, Wild Goose, Wolf.

PRINCESS ANNE, MD.

Members American Association of Nurserymen. All quotations, prices, contracts and grading both for purchase or sale are based on horticultural standards adopted by this Association June, 1923. All quotations are for immediate acceptance subject to stock being sold without liability to us should injury befall the stock from frost, flood, hail, fire or other causes beyond our control.

To Our Many Patrons and Friends:

It is with pleasure that we announce to you that last spring's business was the greatest we have ever enjoyed. So many orders came in that at times it looked to us as if we would be swamped by them, but, by working day and night we were able to get them all filled and off to the customer in good time and in best of condition.

We have received many letters of praise on the splendid quality of our trees and the fine way in which they have grown. Mr. F. C. Bancroft, of Wyoming, Dela. says "Every tree I bought from you last spring grew, with the exception of one, and it would have grown, but we ran over it with the tractor". Mr. Bancroft is a large orchardist and bought about 1500 trees. Mr. Loose, Manager of the Commercial Orchards of Delaware, says, "Every tree that we received from you grew and made the most wonderful growth we ever saw a young set of trees make". Mr. McLain, of Red Bank, N. J. says, "All of my 1500 Apple and Peach grew and are making a most wonderful growth. These trees were examined by our Department of Horticulture and pronounced absolutely right in every way".

We say to you that if you are going to plant an orchard of from 1000 to 5000 trees, place your order for them soon and have them shipped to you this Fall. On large orders we make you special prices which are based on wholesale rates. We want your business and then we want to supply you with such fine stock that you will always remain a customer.

The best of stock true to name and an absolutely fair deal is what we offer to all of those who patronize us. Thanking our many customers for thier liberal patronage and soliciting the business of those who have never dealt with us we are.

Yours Truly,

BOUNTIFUL RIDGE NURSERIES

Compas Cherry Plum, 2 year, 4 5 feet
..... \$1.25 each

PEARS

BARTLETT—Large size. Golden when ripe, with a beautiful blush next the sun. Buttery, very juicy, and highly flavored; tree a strong grower, bears early and abundantly; very popular. August, September.

CLAPP'S FAVORITE—A large fine pear resembling the Bartlett, but without its musky flavor; pale lemon-yellow with brown dots, and fine texture, melting, buttery, juicy with a delicate flavor; tree hardy and productive. August and September.

KIEFFER — Large; golden yellow, often blushed in the sun; juicy and melting. One of the best for canning and preserving; the most profitable to grow. Tree healthy, hardy and vigorous. Does not succeed on quince, therefore no draws should be planted. Kieffer receives more praise and condemnation than any other. It is liable to overbear, therefore special pains should be taken to thin the fruit.

BEURRE BOSC—Greatly esteemed. A large yellow pear; flesh white, rich and delicious; has long stem which allows it to sway in heavy winds without dropping. The tree is a slow grower, but most productive, keeps until Christmas.

Other reliable varieties we have—Wilder, Anjou, Flemish Beauty, Carber Seckle, Sheldon, Vermont Beauty, Worden Seckel.

BLACKBERRIES

BLOWERS—Originated in the celebrated small fruit belt of Chautauqua County, New York, where it has been thoroughly tested for several seasons. Claimed to be the hardiest, most productive, the finest quality, and to bring on the market the highest price of all blackberries. Large size, jet black, good shipper, best quality and unexcelled produc-

tiveness are the main characteristics of this splendid new sort.

RATHBURN—A strong, erect grower, and hardy; fruit is sweet, luscious, without a hard core; high flavor; jet black, small seeds; firm enough to ship and handle well. One of the largest size berries. Especially valuable for central and southern territory.

Other varieties: Early Harvest, Eldorado, Erie, Mersereau, Snyder.

Lucretia, strong, well rooted plants, No. 1	\$1.50	\$4.00	\$30.00

RASPBERRIES

ST. REGIS EVERBEARING (Red)—The new everbearing variety. It gives a crop of fruit all summer and autumn fruiting on the old canes in generous quantities until late in August. By this date berries begin to ripen on the young canes and continue until late in autumn. Berries are a bright crimson of large size and of surprising quality, sugary with full raspberry flavor. It suc-

ceeds upon all soils, whether light and sandy or cold heavy clay and the canes are absolutely hardy.

CUMBERLAND (Black)—The largest of all blackcaps. A healthy, vigorous grower, throwing up stout, stocky, well-branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality good. Mid-season.

Other Varieties: Cardinal, Cuthbert, Kansas, Columbia.

Prices all varieties:

DIRECT FROM GROWER TO PLANTER

ASPARAGUS

PALMETTO—The most popular variety, both for home garden and commercial planting. Larger, more productive and earlier than Conover's Colossal.

CONOVER'S COLOSSAL—This variety is

much superior in size and quality to any of the old common sorts, being remarkably tender and fine-flavored. The large green shoots, one to two inches in diameter, are sent up thickly from the crowns, making it a very profitable variety.

	25	100	500	1000
All strong, healthy roots, 2 yr., No. 1.....	\$1.00	\$2.50	\$8.00	\$12.00

WASHINGTON ASPARAGUS

A new rust-resistant variety of great promise that is being planted largely in every asparagus section. The stalks are large, dark green, with a heavy purple overtone. The tips are tight and firm and do not open until well out of the ground. Prices of strong one-year roots.

10 for 75c; 100 for \$2.75; 1000 for \$16.00—600 at 1000 rate.

GOOSEBERRIES

Downing, Houghton, Oregon, Champion, Pearl, Red Jacket

GOOSEBERRIES—All Varieties

Fine, strong 2 yr., bushes, No. 1 each, 40c 6 to 10, 35c each 50 to 100, 30c each

STRAWBERRIES

AROMA—Large, dark red; uniformly roundish, heart shaped; flesh firm and of very good quality. Stands shipping well; plants vigorous and very productive; blossoms rich in pollen and is good fertilizer for imperfect varieties. Late.

KLONDIKE—Large; red; flesh, firm, red to the core, with a mild and delicious flavor, unlike any other variety. Is very popular with southern growers who ship. Plant tall, compact, vigorous grower; resists frosts well and yields good crops. Perfect. Mid-season.

Other Varieties: Charles 1st, Dr. Burrill, Gandy, Gibson, Pocomoke, Senator Dunlap, Warfield.

Testimonials

Romney, W. Va., Dec. 26th, 1923.
Bountiful Ridge Nurseries,
Princess Anne, Md.

Dear Sirs:

The box of trees arrived and my foreman says are very fine and in splendid condition.

Yours very truly,

G. P. MILLER.

Note: Mr. Miller is one of the largest orchardists in West Virginia, an expert grower of Apples and one of the pioneers in the orchard business in that state.

Rosina, W. Va., March 28, 1924
Bountiful Ridge Nurseries,
Princess Anne, Md.

Dear Sirs:

I thank you very much indeed for sending my trees by parcel post. I received trees in first class order yesterday, they are much larger than I expected. I have received trees from two other Nurseries this spring, but none pleased me as well as yours.

Very respectfully,

JOSEPH M. HILL.

Bridgeville, Dela., March 17, 1924.
Bountiful Ridge Nurseries,
Princess Anne, Md.

Gentlemen:

Yours of March the 15th came today, and I enclose check for to cover bill for trees bought and now write that trees came in very nice shape and condition. My manager of apple orchards just told me the trees were very nice and all O. K. Please accept thanks for the two extra Rome Beauty.

Yours truly,

H. P. CANNON.

Testimonials

Egg Harbor, N. J., May 29th, 1925
Bountiful Ridge Nurseries,
Princess Anne, Md.

I feel it my duty to say to you I am greatly pleased with the one hundred Apple trees I bought from you early this spring, they were received by me in the best of condition, carefully packed, not a single tree scarred or injured in any way. I planted them as I think a tree should be planted and every tree is living and more every tree is in good healthy growing condition and doing fine, and I am pleased, you sure will get an order from me for Peach trees if I live to see next fall or spring. I am a Landscape Worker and Market Gardener, 70 years of age. My neighbors have asked me lots and I speak for you and your way of doing business, they all like the way the trees have done for me.

Yours truly
E. P. KAUFER.

Mt. Kisco, N. Y., March 24, 1925.
Bountiful Ridge Nurseries,
Princess Anne, Md.

My dear Mr. Kemp:

I must say the Peach trees which were sent to Delaware to me are the best stock I have seen and better than most stock that cost me twice as much. I shall be pleased to meet you and have you look over my place whenever you come to Delaware.

Cordially yours,
DR. F. A. RUSH.

Hubbard, Ohio, May 21st, 1925.
Bountiful Ridge Nurseries,
Princess Anne, Md.
Gentlemen:

The trees that I got from you last fall are all living. We planted them soon after we received them. I planted trees from five different Nurseries at the same time and your trees stood the winter as well as trees from Geneva, N. Y. Trees from another Nursery died down to near the ground. I pruned your trees at 30 inches from the ground and every one stood the winter. I am pleased with your trees and will order some more later on.

Yours respectfully,
HERBERT ROWLAND,
R. F. D. 2, Hubbard, Ohio.

Bridgeville, Dela., March 14th, 1925.
Bountiful Ridge Nurseries,
Princess Anne, Md.
Dear Mr. Kemp:

I saw Mr. Cannon last night, he will be down today and bring Mr. Dutton of Seaford with him, they want some trees. I was coming down but have to go to Philadelphia. Suppose you got the order I sent you yesterday.

Very truly yours,
O. A. NEWTON,
President of State Board of Agriculture

Arbormead Farm, Hatboro, Pa.
April 2nd, 1925.

Mr. Geo. W. Kemp,
Bountiful Ridge Nurseries,
Princess Anne, Md.

My Dear Sirs:

In reply to yours of the 31st inst., I am glad to report that the big crate of trees that left Princess Anne on the 22nd arrived promptly and safely in Hatboro station on the 27th. Our agent called me on the phone immediately and notified us they landed.

Well, we brought them home (4 miles west of town) and unpacked them and healed them in as soon as practicable. I wish to assure you that they are entirely satisfactory, they were found perfectly fresh, moist and in the pink of condition, but I do not know how in the world you ever managed to put so many in that crib, large as it was, your packers show some skill.

In 25 years experience I have handled and planted hundreds of trees ordered from New York State to Nebraska, and from Tennessee to Illinois, yet I can truthfully say that I never saw any finer trees than yours come into the State of Penna. They couldn't be better in any way. The Peach trees prove their fruitfulness by their bursting blossoms. I want to thank you heartily for all and particularly for your trouble in procuring the Whitethorn Crataegus Alba Pleno, that you promised to send me by mail, at your request I am sending you my bill for freight on the trees which as you see is \$1.60.

With best wishes for health and success, I remain,

Sincerely,
CHARLES S. MANN.

Osbornville, N. J., May 8th, 1924.
Bountiful Ridge Nurseries,
Princess Anne, Md.
Gentlemen:

Enclosed find our check for amount due you on trees purchased from you, same arrived in fine condition. Thanking you for filling our order so promptly and assuring you that we are satisfied with the stock sent us, we remain,

Respectfully yours,
OSBORN BROTHERS.

Hammonton, N. J., March 17, 1924
Bountiful Ridge Nurseries,
Princess Anne, Md.
Dear Sirs:

Trees arrived in very good condition, they are about the best lot of trees I have ever received. I can give you a good recommendation if any one inquires about stock and condition of trees.

Yours truly,
P. J. FITTING & SON.

Testimonials

Fruitland Farm, St. Remy, N. Y.
March 15th, 1924.

Bountiful Ridge Nurseries,
Princess Anne, Md.

Dear Sirs:

Received the trees some time ago in fine condition and am well pleased with them.

Yours truly,
TRACY M. VAN VLEIT.

Newton, N. J., March 24th, 1924

Bountiful Ridge Nurseries,
Princess Anne, Md.

Gentlemen:

Received trees Saturday. They are in every way satisfactory.

WM. McCALDIN.

BETTER THAN HE EXPECTED

Belmont, N. C., March 23, 1926.

Bountiful Ridge Nurseries,
Princess Anne, Md.

Gentlemen:

The nursery stock came yesterday and notwithstanding the delay in transit it was in fine condition. It was all that I could have expected and more. The peach trees were much better than I ordered.

Yours sincerely,

J. K. HALL.

A SHIPMENT MADE ON APPROVAL

Freehold, N. J., April 7, 1926.

Bountiful Ridge Nurseries,
Princess Anne, Md.

Gentlemen:

I have received your trees and I am satisfied with the order. The trees had arrived at a reasonable time. I am thanking you for your rapid work in shipping my order as soon as possible.

Hoping to receive the bill soon so as to serve you as you served me,

Yours truly,

MICHAEL BODIUNK.

Enfield, N. H., April 12th, 1924.

Bountiful Ridge Nurseries,
Princess Anne, Md.

The Duchess Apple trees received and will say that they are the best lot of 1-Yr. trees we have ever bought. In the past we have bought mostly Wetsern-N. Y. Grown trees, about 3000 in all and will say that you have those growers trimmed, both as to quality and price. I will say that we are able to identify most of the varieties we plant, and I would pronounce these trees strictly true to name.

Very truly yours,

F. L. COLBY,

Please accept thanks for the two extra trees.

Nazareth, Penna., April 8th, 1924.

Bountiful Ridge Nurseries,
Princess Anne, Md.

Dear Sirs:

My trees arrived today in fine condition, and am truly more than pleased with them. What trees we want hereafter you will get my order for them. We received four trees from another Nursery, their trees were not as nice as yours and they cost me \$9.50, but that will be the last. I thank God that I got hold of the Rural Newyorker, for it will save us dollars hereafter. Thanking you for your kindness and the lovely trees, I remain,

Yours truly,

MRS. WILLIAM H. BENDER.

WILL RECOMMEND OUR STOCK

Greenwood, Del., December 1, 1925.

Bountiful Ridge Nurseries,
Princess Anne, Md.

Gentlemen:

The trees which I ordered from you are very fine and we are well pleased with them. In traveling around the country I am often asked questions about fruit trees and nursery stock. If there arises an occasion when I can be of service to you in recommending your products I will not hesitate to do so. Enclosed you will find my check for \$160.26 in payment for value received.

Very truly yours,

WILSON C. HATFIELD.

Hammonton, N. J., Dec. 5th, 1925

Bountiful Ridge Nurseries,
Princess Anne, Md.

Box of trees arrived and are very fine. We are certainly pleased with them. Enclosed find check in payment of same.

DAMINGER BROS.

A WELL PLEASED CUSTOMER

Middletown, Md., April 9, 1926

Bountiful Ridge Nurseries,
Princess Anne, Md.

Dear Sirs:

The trees arrived today and will say they arrived in fine condition, and were the nicest trees we ever bought, so large and thrifty. I will take pleasure in showing them to our friends. I thank you very much for the extra peach trees sent.

Very truly yours,

RIDGELY A. WILLARD.

Westwood, N. J., March 20th, 1924

Bountiful Ridge Nurseries,
Princess Anne, Md.

Dear Sirs:

Trees came yesterday in fine condition. I am well pleased with them.

Respectfully yours,

G. E. STORMS.

Budding crew in a block of our peach seedlings, budding 200,000 seedlings in this block. Note how thrifty they are. The cross mark on the photo is to identify George W. Kemp, General Field Manager, keeping a close watch on the budders to see that the work is done properly and to keep the varieties pure and true to name.

Testimonials

Repeat order brings added praise for our trees. Mr. Huddleson has learned of the superiority of our stock.

Warrenton, Va., March 16, 1925.
Bountiful Ridge Nurseries,
Princess Anne, Md.
Gentlemen:

The bill of trees arrived on the 10th. I will take pleasure in showing to my neighbors they are certainly nice trees. I frequently order for other people and you may look for more orders in the future.

Very truly yours,
H. W. HUDDLESON.

Warrenton, Va., March 26, 1926
Bountiful Ridge Nurseries,
Princess Anne, Md.
Gentlemen:

The bill of trees shipped on the 18th was received on the 20th in prime condition. They were the finest rooted and thrifty trees I believe I ever received from any nursery and I have ordered hundreds of dollars worth in my time. Thanks for the fine shipment.

Yours very truly,
H. W. HUDDLESON.

A view of one of our blocks of One Year Peach Trees with which we fill our Customers orders. Picture taken August 1st, 1925. Note height of trees on this date. To plant trees like these means a successful orchard for you.

A close-up of our One-Year-Old Peach Trees. Note the fine, healthy condition of the trees. They are sure to give you the desired results. Photo taken August 1st, 1925.
